

# Future City Metropola

Build your own city according to your ideas!

How does your city of choice look like?

In our event, you are the one choosing! You will be put together in small teams and will conceive and build a district in your individual futuristic metropole. During the conception and in the building phase are mainly communication and team work decisive for a harmonic urban image. Together in a team you will create something bigger and will grow beyond yourself. Whether you are a creative person or a strategist, each member of the team is equally important and contributes to the overall performance, just like in your company. Celebrate at the end of the construction, when your dream city wraps itself in a sea of thousand lights.

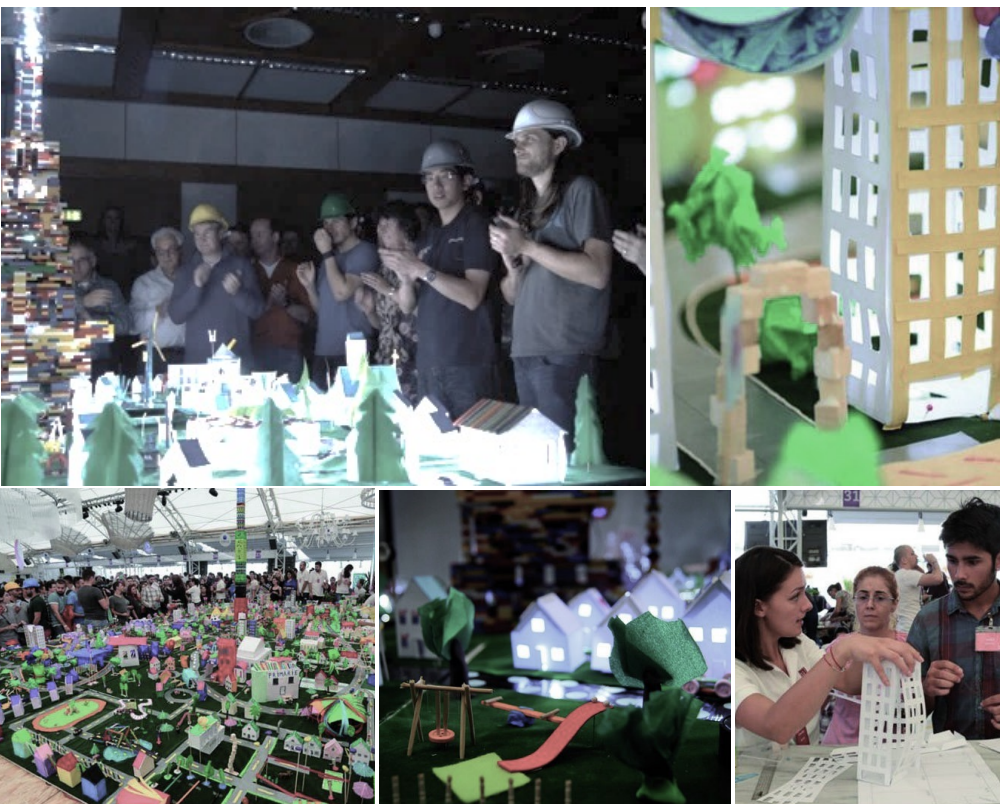

## Services of Future City Metropola:
